Forecast for Sunday 23 Oct 2022

Weather: Variable cloud, patchy hill fog and clear intervals overnight along with some patchy rain. The morning and early afternoon will be largely dry, but variable cloud, some hill fog in the east and sunny intervals in the west with the odd shower. Then more general cloud and outbreaks of rain will spread from the south in the early evening, with a small risk of lightning..

Chance of cloud-free hill tops above 800m: 60% in west 20% in east.

Low cloud and visibility: Generally widespread cloud bases 600-800m, lowering 400m in Easter Ross and Sutherland, but likely well broken and above summits in the west until evening. Moderate or poor visibility in the heavier rain and mist but mainly good at other times away from cloud.

Met Office Aberdeen Meteorologist's View
Poor visibility and developing wet conditions will bring a challenging day on the hills.

Forecast for Monday 24 Oct 2022
Weather: Cloud drizzle and widespread hill fog overnight gradually breaking up. Still some low cloud around at first but becoming bright with some sunny spells developing during the morning, though perhaps taking longer to brighten in the far north. A few showers in the afternoon becoming heavier in the evening with the chance of.

Maximum wind: South or southwesterly 15 to 20mph with gusts up to 30mph, increasing 30 gusts 45mph in the evening

Chance of cloud-free hill tops above 800m: 10% in early hours lifting 60% by morning.

Low cloud and visibility: Areas of cloud at 300-500m likely at first gradually breaking later in night and in morning. Then patchy above 900m, occasionally 750m in the west in the evening. Visibility away from cloud, moderate or poor in any early mist but generally good visibility with occasional drops in showers in the west.

Temperature: **Glens:** 9 Celsius rising to 15 Celsius.
At 800m: Plus 9 Celsius.
Freezing level: Well above summits.
